

Secondary Journeys of Discovery

All of our sessions are linked to the **new curriculum**, involve **unique learning experiences to fit your unit of learning** and can be **pitched to students from years 9 - 11**.

Journey of Discovery: Where Do I Belong?

Year 9

Put on your scientist hat and discover the many ways animals can be grouped. An opportunity for students to encounter our zoo animals and unique setting before scientifically classifying the living world.

Journey of Discovery: Unique New Zealand

Year 9

Uncover the world of wildlife in Aotearoa – past and present. Discover what makes our flora and fauna so special.

Journey of Discovery: Designer Animals

Years 9 - 11

Investigate how a range of animals are suited to their habitat and how they respond to environmental changes, or consider how various life processes are carried out within the animal kingdom.

Journey of Discovery: Born Free?

Years 9 - 11

Are Zoos the best places for animals? Understand animal husbandry in captivity or come to terms with the importance of genetics in captive breeding programmes.

Journey of Discovery: Earth Story

Years 9 - 11

What impact do humans have on ecosystems in New Zealand and the rest of planet Earth? Explore interdependence within different habitats.
